GOVERNMENT OF TAMIL NADU
DISASTER RESPONSE AND RELIEF COMMAND CENTER, CHENNAI

AI-DRIVEN WEATHER CONDITIONS REPORT

Coverage: 426 Chennai Sectors | Generated on: 31-Aug-2026 10:41 AM

Issued By: State Disaster Admin	**Role:** GOV Controller
Classification: FOR OFFICIAL INTERNAL USE ONLY	**System Protocol:** MET-CLIMATIC DIAGNOSTIC ANALYSIS

1. Executive Summary & Regional Weather Condition

AI climatic analysis completed across all 426 Chennai monitored areas. Currently, 0 sectors are flagged with Extreme weather conditions, and 5 sectors are experiencing Severe weather indices. Low-lying delta zones in Zone 13 Adyar (including Velachery corridors) and Zone 14 Perungudi show elevated waterlogging risks. Coastal sectors report high-velocity wind warnings up to 68 km/h. Primary recommendations: Deploy inflatable boats to Velachery transit centers, clear sewage inlets, and activate secondary backup generators at relief camps.

Weather Condition Level	Number of Sectors	Immediate Response Guidelines
Extreme	0	Mandatory evacuation, activate primary storm barriers & shelters.
Severe	5	High alert, deployment of emergency rescue squads on standby.
Moderate	110	Close monitoring of active waterlogging drainage pumps.
Low	311	Standard routine diagnostics, normal alert profile.

2. Flagged Severe / Extreme Weather Sectors

The following areas are flagged under Severe or Extreme weather thresholds requiring emergency monitoring:

Sector Name	Temp (°C)	Rain (mm/h)	Humidity (%)	Wind (km/h)	Condition Level
T. Nagar Sector B	31.8°C	64.2 mm	74%	25.7 km/h	Severe
Madipakkam Sector N	28.5°C	63.9 mm	74%	31.3 km/h	Severe
Sholinganallur Sector E	30.5°C	63.5 mm	78%	43.1 km/h	Severe
Sholinganallur Sector I	28.1°C	33.3 mm	81%	64.5 km/h	Severe
Perungudi Sector G	32.7°C	51.5 mm	81%	33.0 km/h	Severe
