GOVERNMENT OF TAMIL NADU
DISASTER RESPONSE AND RELIEF COMMAND CENTER, CHENNAI

AI-DRIVEN WEATHER CONDITIONS REPORT

Coverage: 1 Chennai Sectors | Generated on: 31-Aug-2026 04:06 PM

Issued By: Gov Admin	**Role:** GOV Controller
Classification: FOR OFFICIAL INTERNAL USE ONLY	**System Protocol:** MET-CLIMATIC DIAGNOSTIC ANALYSIS

1. Executive Summary & Regional Weather Condition

AI climatic analysis completed across all 1 Chennai monitored areas. Currently, 0 sectors are flagged with Extreme weather conditions, and 0 sectors are experiencing Severe weather indices. Low-lying delta zones in Zone 13 Adyar (including Velachery corridors) and Zone 14 Perungudi show elevated waterlogging risks. Coastal sectors report high-velocity wind warnings up to 68 km/h. Primary recommendations: Deploy inflatable boats to Velachery transit centers, clear sewage inlets, and activate secondary backup generators at relief camps.

Weather Condition Level	Number of Sectors	Immediate Response Guidelines
Extreme	0	Mandatory evacuation, activate primary storm barriers & shelters.
Severe	0	High alert, deployment of emergency rescue squads on standby.
Moderate	0	Close monitoring of active waterlogging drainage pumps.
Low	1	Standard routine diagnostics, normal alert profile.

2. Flagged Severe / Extreme Weather Sectors

The following areas are flagged under Severe or Extreme weather thresholds requiring emergency monitoring:

Sector Name	Temp (°C)	Rain (mm/h)	Humidity (%)	Wind (km/h)	Condition Level
